

Jonatas Pedraza

Backend, frontend, architecture, and cloud for products that must scale with reliability.

jonatas.nona@gmail.com LinkedIn GitHub Carpina, PE, Brazil

ABOUT

Software Engineer with 10+ years of experience across backend, architecture, cloud, and DevOps — plus recent frontend work (React/TypeScript). Experience on credit, payments, food delivery, telecom, and video platforms. Core stack: Node.js, TypeScript, NestJS, Python, Go, PostgreSQL, Redis, Elasticsearch, AWS, Docker, Terraform, and Datadog. Hands-on end to end: APIs, microservices, observability, and delivery with product and design. Hands-on with AI-assisted development tooling (Codex, Claude, Cursor; skills, rules, MCPs) and Spec Kit / OpenSpec for disciplined planning and delivery.

SKILLS

Node.js · TypeScript · NestJS · React · PostgreSQL · AWS · Docker · Microservices · Datadog · CI/CD

Backend & APIs — Node.js, TypeScript, NestJS, Microservices, Python, Go, C#, REST

Frontend — TypeScript, React, Playwright, Figma

AI / DX — Cursor, Claude, Codex, MCP, Spec Kit, OpenSpec

Architecture — Clean Code, Clean Architecture, Design patterns, Distributed systems, Scalability, Resilience

Cloud & DevOps — AWS, Docker, CI/CD, Terraform, Packer, Ansible, Linux, Shell Script

Data & Observability — PostgreSQL, Datadog, MySQL, MongoDB, Redis, Elasticsearch, Metrics, Logs

EXPERIENCE

Software Engineer — Nuvemshop

Mar 2024 — Present · São Paulo, Brazil

- Evolving the credit platform (offering, management, and operations) across backend and frontend
- Integrating partner APIs into the credit engine (analysis and approval flows)
- Building the credit frontend with React, TypeScript, Figma, and Playwright
- Shipping back-office tools for a lean product/design/operations squad
- Investigating production incidents with Datadog (metrics, logs, root cause)

TypeScript · Node.js · React · Figma · Playwright · PostgreSQL · Redis · AWS · Datadog

Software Architect — Delivery Much Brasil

Jun 2021 — Feb 2024 · Santa Catarina, Brazil

- Designed and implemented food-delivery microservices on AWS
- Turned business requirements into technical decisions and clear specs with stakeholders
- Supported tech leads on standards, documentation, CI, and agile practices
- Hands-on in critical squads with legacy systems and complex integrations

NestJS · Node.js · TypeScript · Docker · MongoDB · PostgreSQL · Redis · Elasticsearch

Software Engineer — Pagar.me

Aug 2017 — Jun 2021 · São Paulo, Brazil

- SRE on online payment systems focused on availability and scale
- Architecture and infrastructure evolution for distributed applications
- Elasticsearch cluster design and operations with squad support: redesigned the read-layer cluster (dedicated nodes per workload, following Elastic best practices), cutting read-layer incidents by ~85%
- Automated provisioning and delivery with Terraform, Packer, Ansible, and Docker on AWS

Python · JavaScript · Go · C# · AWS · Terraform · Packer · Ansible · Docker

System Integration Engineer — Nokia Networks

Dec 2015 — Aug 2017 · Rio de Janeiro, Brazil

- System integration for telecom operators across heterogeneous environments
- Third-party IoT integrations and ETL pipelines (Greenplum, MySQL)
- Automated server and Nokia-solution provisioning in the datacenter with Packer, SSH, and Ansible/Shell: cut the cycle from ~168 h (~7 days) to ~48 h (~2 days)

Packer · Ansible · Shell Script · Linux · MySQL · Greenplum · Elasticsearch · Git

Software Engineer — Globo.com

Nov 2014 — Nov 2015 · Rio de Janeiro, Brazil

- Backend services and APIs for live and on-demand video delivery
- Focused on performance, scale, and resilience in microservices
- Built AI agents to detect video transmission failures; ~35% of open tickets were of that type, and with the agents we brought that share down to nearly zero
- Improved CI/CD pipelines with the DevOps team

Python · Node.js · JavaScript · Redis · Docker · PostgreSQL · MongoDB · Elasticsearch · Nginx

KEYWORDS

crédito · pagamentos · food delivery · microservices · observability
